DIRECTIONS. In table below will be found printed the years from 1801 to 1900 A. D. inclusive, with the number of form in above diagrams to use to find the day of week on which each month began in each year—*i. e.*, for the year 1830 use Form No. 6 above; it will give the day of week on which each month began in that year. For the year 1844 use Form No. 9 above; it will give day of week on which each month began in that year. For the year 1880 use Form No. 12 above; it will give day of week on which each month began in that year. Apply same rule for any year. If month began on Sunday, use Calendar Table marked Sunday. If month began on Monday, use Calendar Table marked Monday, etc., etc.

1644

A. R. BAKER.

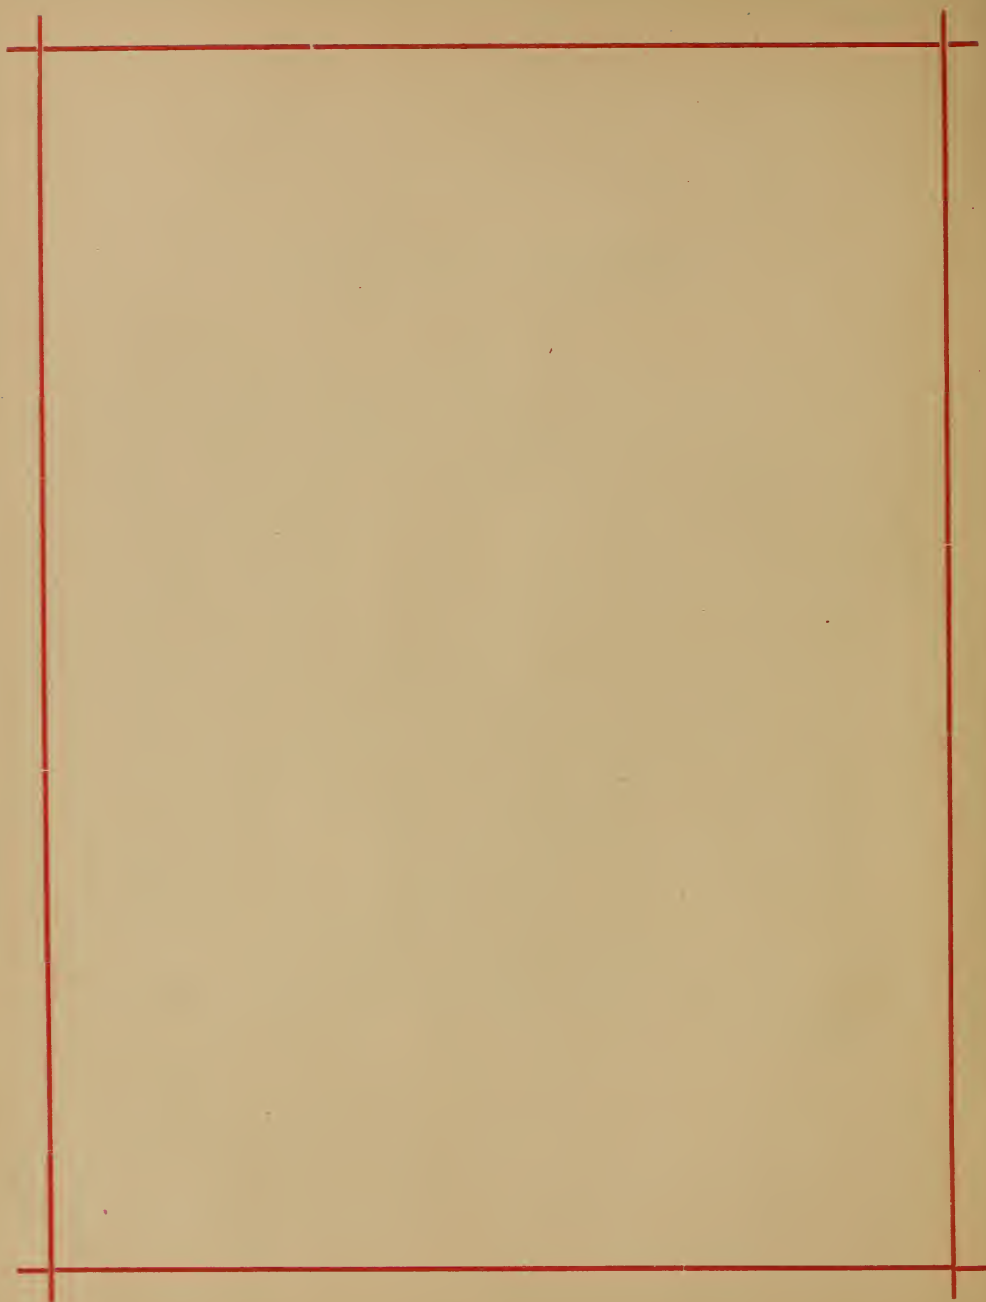

1880.
BAKER & RANDOLPH,
INDIANAPOLIS.

HG 1639
B2

→*HISTORY←OF→CALENDAR*←

Cæser, with the help of Sosigenes, reformed the Calendar in 46 B. C., and introduced our present arrangement of having three years of 365 days followed by one of 366 days, dividing the year into months nearly as at present. The irregularity of alternation in the months of 30 and 31 days was introduced a few years later to gratify the vanity of Augustus, giving his month of August as many days as Julius Cæser's month of July. This Calendar is still in use in the Russian Empire, and was in use in all Europe until 1852. Its error consists in giving the year a length of $365\frac{1}{4}$ days, which is about eleven minutes too much. Pope Gregory XIII ordered October 5th, 1852, to be called 15th, and that all centurial years which are not multiples of 400, should not be made leap years. Thus 1600 was a leap year and 2000 will be the next that falls on a centenary year. This is called the Gregorian Calendar, and is at present used in all christian countries, except Russia. This gives a civil year an average duration 365 d., 5 h., 49 min. and 12 sec., which exceeds the solar year by 22.38 sec., and amounts to the difference of a day only every 3866 years.—*American Encyclopedia.*

EXAMPLE: If note is given on May 20, for 18 days, you will find maturity thus: 20th grace! that is, 158th day of year, which is 7th day of June, showing note to be due June 7-10; note is *really* due, the last day of grace, which is June 10.

Use this form in calculating maturity for a

REGULAR YEARS OF 365 DAYS, IN

We have given 18 months below, for convenience in calculating from last maturity of notes, drawn for any given number of months.
